## ***INTRODUCTION***

This first annual report relates to the activities that were made in the framework of the evaluation of projects funded by the European Commission and of the existing information of the GDs that might be relevant in the territorial intelligence field. It is led by the WP4P [Projects] coordination group during the CAENTI first twelve-month period. It is not yet a state of the art, as it was initially planned, but it is rather a simple activity report about a technical sub-activity.

It is a specific activity, insofar as it corresponds to a suggestion of the CAENTI project evaluators. It was integrated in the WP4 because this work package includes a coordination activity that is linked to territorial information and because most of the concerned projects were *a priori* research ones. Thus, the WP4P coordination group mainly contributes to the second objective of the work package 4 : increasing the territorial information use.

During the CAENTI first ten months of activity, the group was organized and it defined a plan of work. It selected a set of key-words that allowed organizing the search and the identification of projects and information that are relevant in the territorial intelligence field. A first selection of projects was made on the basis of the European directories.

### ***1. ORGANIZATION, OBJECTIVES AND ACTIVITIES OF THE “PROJECTS” COORDINATION GROUP.***

#### ***1.1. Organization and objectives***

During the Kick-off meeting in BESANÇON, on March 23<sup>rd</sup>-24<sup>th</sup>, the representatives of the participants debated the consortium agreement and the composition of the coordination groups, and in particular of the WP4P “Projects”. For the year 2006, the coordination group was composed of eight skilled and experienced researchers who have a good knowledge of the European projects. They work in different parts of the European territory, what allows identifying projects in the main linguistic regions, and contacting their responsible.

Jean-Jacques GIRARDOT, Université de Franche-Comté (France)

Blanca MIEDES UGARTE, Universidad de Huelva (Spain)

Dolores REDONDO TORONJO, Universidad de Huelva (Spain)

Serge SCHMITZ, Université de Liège (Belgium)

Csilla FILO, University of Pécs (Hungary)

Mihai PASCARU-PAG, Universitatea 1er decembrie 1918 ALBA-IULIA (Romania)

Natale AMMATURO, Università di SALERNO (Italy)

Julia FERNANDEZ QUINTANILLA, ACCEM (Spain)

During the meeting of the leaders of the coordination groups of the work package 4 in BESANCON, on June, the 7<sup>th</sup> 2006, the WP4 group objectives were formulated under the form of two questions:

1. Among the projects that were supported by the European Commission, which of them have an object corresponding to the questionings of the territorial intelligence?

2. Which relevant information for territorial intelligence the General Directions of the European Commission have, in addition to those that are published on the official websites?

A first strategy was defined:

1. Identifying the projects that belong to the territorial intelligence field and dividing them according to large European regions between the members of the group so as they make a first evaluation report on the base of a frame established by the group. These evaluation reports are compared within the group.

2. Asking the general directions so as to identify the information they have, that have interest for territorial intelligence and that complete the territorial information that are identified by the WP4I group in the European data bases, especially on Internet.

In order to organize the complementarity of the WP4P and WP4I groups on the theme of the relevant information, we decided to organize a coordination meeting of the WP4I and WP4P after the coordination seminar of the work package 6 “Tools for actors” that was planned on June, the 29<sup>th</sup> in DURBUY, close to LIEGE, in Belgium, insofar as the WP4I is coordinated by the University of LIEGE and most of the members of the two groups will attend the WP6 coordination meeting.

### ***1.2. Coordination meeting of groups WP4I and WP4P in LIEGE (june 2006)***

Amélie BICHET-MIÑARO, as graduate in Political Sciences and Public Law, was in charge of a first identification of projects in the prospect of this meeting, in particular by exploiting the main projects books that are financially supported by the European Commission and the CORDIS website.

She presented a first selection of research projects at the time of the coordination meeting of the WP4I and WP4P groups in LIEGE on June, the 30<sup>th</sup> 2006.

This first identification of the research projects used the following sources:

- European Union-supported research in social sciences and humanities 1998-2005, briefing papers, European Commission, Community research
- Social sciences and humanities in FP6, Projects' synopses all calls, Citizens and governance in a knowledge-based society, Community research
- European Research, A guide to successful communications, General information, European Commission, Community research
- Assessing the Social and Environmental impacts of European research, report, European Commission, Community research
- Broadsheet 2005-2006 ICCR IFS CIR
- CLORA, FP internet web sites

The projects that started before 1998 were rejected.

This identification of relevant projects was made by using a first series of key-words:

- Territorial development
- Sustainable development
- Governance
- Knowledge-based society

It proved itself to be too selective, insofar as it only isolated three projects, mainly within two important groups of projects that are linked on the one hand to governance and on the other hand to social inclusion.

The WP4I group presented the first results about the inventory of the territorial information from European statistic bases and sites and national sites of the countries that are members of the European Union.

As regards the projects identification, the coordination group debated the opportunity to widen:

- The canvassing field to all the funding, beyond the research activity, or
- The key-words used to identify projects, especially by adding:

- Territory, and
- Communication and information technologies.

The debate insisted on the complexity of the identification of action projects. If each one wanted to integrate action projects, the prospect of widening of the canvassing field faced three difficulties:

- The importance of the number of concerned projects of action;
- The fact that, in opposition to the research projects, the action projects are not managed by the European Commission but by national or regional relays;
- Their inventory is often incomplete or disparate but there is one, because of the previous reasons.

It did not seem appropriate to work according to the funding funds, as the European Social Fund, the European Fund of Economic and Regional Development, but rather by programmes.

The funding funds define sets that are too broad and extremely diversified of ground projects. Firstly, we should rather identify programmes such as EQUAL to make the selection within more homogenous sets of projects. On the other hand, the access to projects repertories and the description of these projects are very unequal according to the programmes. An inventory of the programmes will remain to be established so as to value their interest in relation with territorial intelligence and the possibility to ask projects repertories.

The group eventually chose to work again on the selection of research projects with these new two key-words before widening the projects identification to all the general directions, after the selection procedure will be satisfying as regards the research projects and the repertories of action projects will have been identified.

A debate took place about the opportunity to integrate other key-words, but most of the suggested key-words, as participation, were rejected because they are in many projects and they have a different meaning according to the project. They are not selective, neither from a quantitative nor from a qualitative point of view because of their polysemy. Consequently, we should try to find key-words which meaning is relatively objective and does not vary much, otherwise many projects are identified, but few are conserved after having read its summary once.

The debates also concerned the projects evaluation, after they have been selected. The group insisted on the need to ask the projects responsables, and even to meet them.

As regards the information that are available at the GDs level, the group decided to wait for the WP4I to have finished the general inventory that was started at the territorial information level, at the end of 2006, before making a survey by asking the general directions, so as to be able to specify the information we looked for and above all to make the difference with the ones we could identify by ourselves.

### ***1.3. Presentation of activities and prospects of the WP4P in the International Conference of Territorial Intelligence in ALBA IULIA (september 2006).***

A new selection of projects was presented at the time of the presentation of the WP4 activities and prospects in the International Conference of Territorial Intelligence in ALBA IULIA. Nevertheless, it remained limited to five research projects:

- Achieving Sustainable and Innovative Policies through Participatory Governance in a Multi-Level Context
- EXSPRO: Social Exclusion and Social Protection – the Future Role for the EU
- G-FORS : Governance for sustainability
- Neighbourhood Govern : Neighbourhood Governance-Capacity for Social Integration
- REGIONET: Strategies for Regional Sustainable Development: An Integrated Approach Beyond Best Practice

The inventory of the action programmes was postponed because it implies a to get additional information from the general directions, what we planned to do at the beginning of the second period.

So as to widen the first selection of research projects, we suggested making a new definition of the key-words that are used to identify projects.

This proposal went together with the proposal of diversify the research modes by using the classic search engines on Internet, as well as repertories, data bases or European websites that were identified in advance.

The direct use of the Internet search engines is able to identify as action projects as research ones. It gives a bonus to the projects that have a good visibility on Internet, without prejudice of their local visibility. It also implies the research actions are made in several languages.

Consequently it implies a more important mobilisation of the work group and the reinforcement of its coordination because:

- It decentralises the identification of the projects according to a linguistic logic
- The members of the group will also inherit the charge to locate data bases and repertories of action projects which management is often divided by countries or by countries groups.
- The coordination group implies a more regular use of the cooperative workspace CooSpace, to animate the exchanges.

As a consequence in ALBA IULIA we decided a coordination meeting would take place soon to organise the activity of the coordination group. It will particularly be used to widen the list of key-words, in accordance with the specificities of the direct seek on Internet, on the base of suggestions that will be centralised on CooSpace. It will have to concretely organise the prospects on the longer term on the base of the following orientations:

When the projects will have been isolated by the means of key-words, they will be divided at the geographical-linguistic level so as the members of the group contact the projects responsables, to be sure they still exist and to confirm they belong to the territorial intelligence field. They will draft an evaluation report for each of the “confirmed” projects.

Then, the sets of projects will be evaluated by the coordination group on the base of these reports, so as to make a general evaluation report.

The ten most relevant projects will be invited to an evaluation seminar with the members of the coordination group and with the CAENTI actors.

#### ***1.4. Coordination meeting of LIEGE (November 2006)***

Serge SCHMITT and Jean-Jacques GIRARDOT met in LIEGE on November, the 17th 2006 to animate a telephonic meeting to report progress of the WP4P coordination group and to concretely organize the orientations that were defined in ALBA IULIA.

The list of the defined key-words that were used for a first research action was completed as follows (the introduced key-words are notified by a “+”) :

- Territory
- + Community
- Territorial development
- + Sustainable development
- Governance
- + Participation
- + Partnership
- + Global approach
- + Transparence
- Information and communication technologies
- + ICT
- Knowledge-based society
- + Citizenship

The protocol of projects selection was programmed as follows:

In a first time, a global research on Internet by the means of the usual engines will add elements to the present selection. This research action and the projects validation imply a division by country and by languages:

- Serge SCHMITZ : Benelux countries, Austria, Germany, Denmark.
- Blanca MIEDES, Dolores REDONDO : Spain, Portugal

- Jean-Jacques GIRARDOT : France, Switzerland, United-Kingdom, Irelande, Norway, Sweden.

- Natale AMMATURO : Italy, Malta, Greece, Cyprus, Croatia,

- Csilla FILO : Hungary, Slovenia, Poland, Slovakia, Czechia, Finland, Lithuania, Estonia, Latvia.

- Mihai PASCARU : Romania, Bulgaria.

An intersection study between the 17 GD, the European programmes and the management centers will be made by Amélie BICHET-MIÑARO.

Then, it will allow making deepened research actions by programmes websites that can possibly be completed by contacts with the management centers. If necessary, a consultation of archives in Brussels will be able to be made.

The list of the potential projects will be made at the end of December.

The objective in the longer term, if possible at the end of 2007, is to select the projects which responsables will be invited to a seminar at the end of the year to have exchanges with the CAENTI actors. To do so, the coordination group will be widened to actors:

Jean-Marie DELVOYE, OPTIMA (Belgium)

Christiane MARECHAL-RULOT, INTEGRA (Belgium)

Jean-Guy HENCKEL, COCAGNE (France)

Maria Isabel FRANCO LIGENFERT, VALDOCCO (Spain)

The following work program is suggested:

- Division of the projects within the group to contact the projects responsables
- Selection of the projects in the prospect of the seminar and organization of this seminar, at the time of a coordination meeting
- Visit of the projects and interviews with the projects responsables
- Finalisation of the seminar programme at the time of the International Conference of Territorial Intelligence of HUELVA, in October 2007.

This seminar could be about the « uses of territorial intelligence in Europe” (the topic should be deepened) and will have to take place in a central place, which has a easy access and is economic (Paris or Brussels).

## **2. FIRST RESULTS : SELECTION OF 45 PROJECTS.**

At the end of December 2006, a first selection of 45 projects was made by crossing the research modes (from repertories and data bases, by making direct requests on Internet), but all these projects have not been validated yet by the members of the coordination groups because of a lack of time.

[01] Project title: Sustainable urban tourism: involving local agents and partnerships for new forms of governance

Main coordinator: Helmut HERMANN

Address: " INSTITUTE FOR TECHNOLOGY ASSESSMENT AND SYSTEMS ANALYSIS,  
Postfach 3640, 5, Weberstrasse 5, 76021 KARLSRUHE

Country: Germany

E-mail: <http://sut.itas.fzk.de/>

Abstract : The overall goal of the project is to elaborate and promote innovative forms and instruments of local governance to improve urban tourism development involving the principles of sustainability and participatory decision-making

End date: 30/06/03

Key words CAENTI: Governance, sustainable development

Source : Cordis website

[02] Project title: Sustainable development at local and regional levels: methods and techniques to support Ecosites and monitor urban sustainability

Main coordinator: Jean-François DALLEMAND

Address: Institute for Environment and Sustainability, Via E. Fermi, 21020 ISPRA

Country: Italy

E-mail: no e-mail

Abstract: The main objective of this Action is to produce monitoring tools for the evaluation of sustainable development at local level with emphasis on urban and regional processes

End date: 22/10/02

Key words CAENTI: Sustainable development

Source: Cordis website

[03] Project title: Instruments for sustainable regional development

Main coordinator: Ruggero SCHLEICHER-TAPPESER

Address: EURES - Institut fuer regionale studien in Europa, Basler Strasse 19, 79100  
FREIBURG IN BREISGAU

Country: Germany

E-mail: <http://eures.de/insured/insured.htm>

Abstract: To identify the key ecological, economic and social determinants of sustainability at the regional level through formulation of an evaluation framework for sustainable regional development policies and strategies

End date: 30/06/98

Key words CAENTI: Sustainable development

Source: Cordis website

[04] Project Title: Thematic network: strategies for regional sustainable development, an integrated approach beyond best practices

Main coordinator: Ronald J. POHORYLES

Address: Interdisciplinary centre for comparative research in the social sciences, Postfach 1, Schottenfeldgasse 69/1, 1070 WIEN

Country: Austria

E-mail: <http://www.iccr-international.org/regionet/>

Abstract: The overall objective is to provide an integrated approach to support the implementation of sustainable development in regions across Europe

End date: 31/01/04

Key words CAENTI: Sustainable development

Source: Cordis website

[05] Project Title: Development of methodologies and tools to assess links between trade, environment and policies

Main coordinator: Laurence TUBIANA

Address: Institut du développement durable et des relations internationales, 6 rue du général Clergerie, 75116 PARIS

Country: France

E-mail: [iddri@iddri.org](mailto:iddri@iddri.org)

Abstract: This research proposal seeks to develop assessment methodologies in areas that appear particularly promising or particularly urgent

End date: 23/12/06

Key words CAENTI: Sustainable development

Source: Cordis website

[06] Project title: Reflexive Governance in the Public Interest

Main coordinator: Jacques LENOBLE

Address: Université Catholique de Louvain - Centre de Philosophie du Droit, 1 place de l'Université, LOUVAIN-LA-NEUVE

Country: Belgium

E-mail: no e-mail

Abstract: This proposal will focus on emerging institutional mechanisms which seek to answer the question of market failures by means other than command-and-control regulation imposed in the name of the public interest

End date: 31/05/10

Key word CAENTI: Governance

Source: Cordis website

[07] Project title: Integrated urban governance for the city of tomorrow (thematic network)

Main coordinator: Benoît QUIGNON

Address: Communauté urbaine de Lyon, 20 rue du lac, 69399 LYON

Country: France

E-mail: <http://www.interact-network.org>

Abstract: This project aims to produce a new urban integrated management methodology, really adapted to city constraints and to the need of co-operation with other stakeholders, through a networking synergy around sustainable development strategies

End date: 31/12/04

Key words CAENTI: Governance, sustainable development

Source: Cordis website

[08] Project title: Transforming practice for local development professionals

Main coordinator: Gwénaél DORE

Address: INDE - Intercooperação e Desenvolvimento, 211 rua Gomes Freire, 4º Dtº, 1150 LISBOA

Country: Portugal

E-mail: no e-mail

Abstract: The overall objective is to introduce a training programme for community development agents which will provide them with a global approach to the problem instead of the sectoral approach taken previously

End date: no date

Key word CAENTI: Governance

Source: Cordis website

[09] Project title: Measuring Urban Landscape - From hermeneutic approach to sociological / spatial analysis

Main coordinator: Jean-Pierre LE DANTEC

Address: ECOLE D'ARCHITECTURE DE PARIS-LA-VILLETTE, 64 Avenue de Flandre, 75019 PARIS

Country: France

E-mail: no e-mail

Abstract: The intention of this research is to associate from a theoretical and practical point of view the investigations made into the built environment by the Space Syntax laboratory of London University College with the works done about landscape by the laboratory and post-graduate course of the School of Architecture of Paris la Vilette

End date: 31/05/05

Key words CAENTI: Sustainable development

Source: Cordis website

[10] Project title: A time-oriented model for sustainable urban regeneration

Main coordinator: Renato GALLIANO

Address: Agenzia Sviluppo Nord Milano SPA, 23 Via Venezia, 20099 SESTO S. GIOVANNI

Country: Italy

E-mail: no e-mail

Abstract: This project intends to have a sharp focus on improving the quality of urban life experimenting an innovative time-oriented approach to urban regeneration. The project brings together Local Authorities, Universities and local Development agencies from five European countries to develop, test and evaluate an innovative TOOL for a time-oriented description of urban areas

End date: 31/10/05

Key word CAENTI: Governance

Source: Cordis website

[11] Project title: Trade, Societies and Sustainable Development

Main coordinators: Laurence TUBIANA and Sophie THOYER

Address: Ecole Nationale d'Agronomie de Montpellier, Ecole rurale, 2 place Viala, 34060 MONTPELLIER

Country: France

E-mail: thoyer@ensam.inra.fr

Abstract: The overall objective is to analyse interrelated themes: the use of the global public good concept to analyse the interdependencies between economic and sustainability objectives in trade...

End date: 30/09/04

Key words CAENTI: Sustainable development

Source: Cordis website

[12] Project title: Improvement of economic policy co-ordination for full employment and social cohesion in Europe

Main coordinator: Jörg HUFFSCHMID

Address: University of Bremen, Institute for European Economy and Economic Policy, Wilhelm-Herbst-Strasse 1a, 28359 BREMEN

Country: Germany

E-mail: huffschmid@ewig.uni-bremen.de

Abstract: The overall objective is to propose improvements of European economic policy co-ordination, which contribute to the achievement of full employment and stronger social cohesion in an enlarged Union

End date: 01/09/04

Key words CAENTI: Governance, sustainable development

Source: Project Synopses

[13] Project title: A Framework for Socio-Economic Development in Europe? The Consensual Political Cultures of the Small West European States in Comparative and Historical Perspective

Main coordinator: Uwe BECKER

Address: University of Amsterdam, Amsterdam School for Social Science Research, O.Z. Achterburgwal 237, 1012 DL - AMSTERDAM

Country: Netherlands

E-mail: becker@pscw.uva.nl

Abstract: The project aims at comparatively and historically to describe and explain the rules of the game patterning these countries' consensualism, what structural relations - including dominance - it involves, where it originated, how it was institutionalised and by what mechanisms it has been sustained

End date: 01/03/06

Key word CAENTI: Governance

Source: Project Synopses

[14] Project title: The Provision of Basic Services in Liberalised Markets

Main coordinator: Michael SCHMIDT

Address: The Interdisciplinary Centre for Comparative Research, European Developments: Policy and Politics, Shottenfeldgasse 69/1, 1070 - WIEN

Country: Austria

E-mail: m.schmidt@iccr-international.org

Abstract: This project has four specific objectives: it will develop an operational concept of basic services. It will investigate the current regional and social differences in the access to basic services in Europe and how these are affected through liberalisation. It will analyse the different rules, regulations and policies designed to keep the provision of basic services at a predefined level despite liberalisation. It will analyse successful models for the provision of basic services and integrate this knowledge into policy relevant recommendations

Duration: 30 months

Key word CAENTI: Governance  
Source: Project Synopses

[15] Project title: Innovation in the Public Sector  
Main coordinator: Per Melchior KOCH  
Address: Stiftelsen Step, Storgaten 1, 0155 - OSLO  
Country: Norway  
E-mail: per.koch@step.no  
Abstract: The overall objective is to give a better understanding of public sector innovation and policy learning, and to contribute to the development of the theoretical foundation for studies of innovation in the public sector  
End date: 01/01/06  
Key word CAENTI: Governance  
Source: Project Synopses

[16] Project title: Improvement of Sustainability Strategy Elaboration for Economic, Environmental and Social policy Integration in Europe  
Main coordinator: Friedrich O. WOLF  
Address: Eurocom.Gesellschaft fuer Europaeische Kommunikation e.V, Brachvogelstr. 1, 10961 - BERLIN  
Country: Germany  
E-mail: factory@eurocom.org  
Abstract: The objective of the Thematic Network is to use the diversity of scientific approaches to the problems of sustainability as a resource for improving the European sustainability strategy, especially its further elaboration and implementation  
End date: 01/12/05  
Key words CAENTI: Governance, sustainable development  
Source: Project Synopses

[17] Project title: Strategies for Financial Integration with Stronger Social Cohesion and Democratic Control in Europe  
Main coordinator: John GRAHL  
Address: University of North London, Business School, Stapleton House, 277-281 Holloway Road, N7 8HN - LONDON  
Country: England  
E-mail: j.grahl@unl.ac.uk  
Abstract: The overall objective of the Network is to provide a theoretical framework, informed by a technical analysis of historical and current policies and practices, to help formulate strategies for financial consolidation in Europe  
Duration: 36 months  
Key word CAENTI: Governance  
Source: Project Synopses

[18] Project title: Technological Knowledge and Localized Learning: What perspectives for a European policy?  
Main coordinator: Cristiano ANTONELLI  
Address: Fondazione Rosselli, Ces&t (Centre of Science and Technology Policy), Via San Quintino, 18/c, 10121 - TORINO  
Country: Italy  
E-mail: rosselli@inrete.it

Abstract: The objectives of the project are to identify:

- 1) the conditions and the tools for the coordination and governance of the interplay among firms, universities, research organizations and learning agents that leads to generation of new technological knowledge and the introduction of new technologies at large;
- 2) the conditions to take advantage of the new technologies, once introduced, in terms of endogenous endowment of skills and resources and
- 3) to generate relevant policy priorities"

Duration: 24 months

Key word CAENTI: Governance

Source: Project Synopses

[19] Project title: Policy and Innovation in Low Tech (Pilot) Knowledge Formation, Employment & Growth Contributions of the ""old Economy"" Industries in Europe

Main coordinator: Harmut HIRSCH-KREINSEN

Adress: University of Dortmund, Chair of Technology and Society, Faculty for Economics and Social Science, Otto-Hahn-Str. 4, 44221 - DORTMUND

Country: Germany

E-mail: g.bender@wiso.uni-dortmund.de

Abstract: The project aims at a deeper understanding of the growing knowledge intensity of the economic and social development in Europe

End date: 01/12/05

Key word CAENTI: Governance

Source: Project Synopses

[20] Project title: City-Regions as Intelligent Territories: Inclusion, Competitiveness and Learning

Main coordinator: David CHARLES

Adress: University of Newcastle Upon Tyne, Centre for Urban and Regional Development Studies, Kensington Terrace, 6, NE1 7RU - NEWCASTLE UPON TYNE

Country: England

E-mail: d.r.charles@ncl.ac.uk

Objectives: To test theories relating to knowledge societies and learning societies through empirical investigation of forms of knowledge and learning within selected cities. To identify the key roles played by cities in the wider knowledge economies of their regions and identify the types of knowledge resources used by different networks within the city-regions. To investigate the institutions involved in collective learning processes within the case study cities, and specifically the roles played by tertiary education institutions and other forms of educational provider. To assess the success of existing strategies to enhance learning and knowledge development within the cities, and identify potential good practices or lessons that could be disseminated more widely. To develop indicators relating to knowledge, learning processes and institutional engagement that will be helpful to local and regional authorities in developing appropriate intervention strategies

End date: 01/02/06

Key word CAENTI: Governance

Source: Project Synopses

[21] Project title: Innovation, Networks and the Creation of Knowledge

Main coordinator: Robin COWAN

Adress: University of Maastricht, Maastricht Economic Research Institute on Innovation and Technology, Tongersestraat 49 - P.O. Box. 616, 6211 LM - MAASTRICHT

Country: Netherlands

E-mail: r.cowan@merit.unimaas.nl

Abstract: The main objective is to create a network that will improve our understanding of the nature, role and functioning of networks in the economy

End date: 01/12/04

Key words CAENTI: Governance, Sustainable development

Source: Project Synopses

[22] Project title: Policies for Research and Innovation in the Move Towards the European Research Area

Main coordinator: Philippe LAREDO

Address: Observatoire des Sciences et des Techniques, 93 rue de Vaugirard, 75006 - PARIS

Country: France

E-mail: philippe.laredo@obs-ost.fr

Abstract: It will explore the feasibility and conditions of creation of a network of excellence on the shaping of research and innovation policies in the move towards the European Research Area

End date: 01/04/04

Key word CAENTI: Governance

Source: Project Synopses

[23] Project title: Social innovation, governance and community building

Main coordinator: Frank MOULAERT

Address: CNRS - Institut Fédératif de Recherche sur les Economies et les Societes Industrielles IRESI-CNRS-FR1768, 2 rue Canonniers, 59800 LILLE

Country: France

E-mail: frank.moulaert@ifresi.univ-lille1.fr

Objectives: to formulate an alternative model for local innovative development, and to confront the alternative model of local and regional innovation with practices and initiatives in the local social economy of 9 cities in 6 EU countries

End date: 01/09/04

Key word CAENTI: Governance

Source: Project Synopses

[24] Project title: Neighbourhood governance-Capacity for Social Integration

Main coordinator: Goeran CARS

Address: Kungliga Tekniska Hoegskolan, Infrastructure and Planning, Regional Planning, 100 44 - STOCKHOLM

Country: Sweden

E-mail: cars@infra.kth.se

Abstract: The overall objective is to identify and assess possible new governance structures to combat social exclusion in contemporary Europe

End date: 31/03/04

Key word CAENTI: Governance

Source: Project Synopses

[25] Project title: Innovation in the small firms and dynamics of local development

Main coordinator: M. Teresa DE NORONHA VAZ

Address: Universidade do Algarve, Unidade de Ciências Economicas e Empresariais, Campus de Gambelas, 8000 - FARO

Country: Portugal

E-mail: mtvaz@ualg.pt

Abstract: The overall objective is to study innovation in low-tech, small and very small enterprises in Europe's lagging areas by looking at their role in local development and the effect of the local environment on their innovative potential

End date: 31/01/03

Key word CAENTI: Governance

Source: Briefing Papers

[26] Project title: Sustainable Growth, Employment Creation and Technological Integration in the European Knowledge-Based Economies

Main coordinator: Pier Carlo PADOAN

Address: College of Europe, Department for Economic Studies, Dijver 11, 8000 - BRUGGE

Country: Belgium

E-mail: padoan@axcasp.capsur.it

Abstract: The aim of this project is to investigate the impact of technological globalisation and the rise of business services on national patterns of specialisation and their impact on growth and employment in Europe

End date: 01/02/04

Key words CAENTI: Governance, sustainable development

Source: Project Synopses

[27] Project title: Governance by Committee: The role of committees in European policy-making and in policy implementation

Main coordinator: Guenter SCHAEFER

Address: European Institute of Public Administration, European Public Administration, 1229, O.L. Vrouweplein 22, 6201 - MAASTRICHT

Country: Netherlands

E-mail: g.schaefer@eipa-nl.com

Abstract: The objective of this project is to provide an analysis how different committees in the EC policy process fulfill their basic functions as providers of expertise and to what extent they constitute a central aspect of the "democratic legitimacy" of the evolving system of European governance

End date: 01/03/02

[36] Project title: Strategies and Policies for Systemic Interactions and Convergence in Europe

Main coordinator: Manuel Mira GODINHO

Address: Centro de Investigacao Sobre Economia Portuguesa

Country: Portugal

E-mail: mgodinho@iseg.utl.pt

Abstract: The project had 5 objectives: it set out to assess whether economic and technological convergence is occurring between LFRs and the most advanced regions of the EU and, if so, what rate, and to identify factors slowing down or stimulating the convergence process; it looked at the intensity, quality and sustainability of the interactions between firms, universities, government laboratories, interface agencies, financial institutions and other relevant agents to see if systems of innovation are emerging within the LFRs; the aim was to analyse the science and technology and innovation policies in the LFRs to determine best practice; the study looked at the strategies of other agents such as private firms, research and technology organisations, universities, etc for acquiring and developing capabilities which could further the competitiveness of their regions and contribute to the narrowing of the gap with the most advanced regions; it was to involve end-users with the implementation of practical measures and initiatives to disseminate the results of the research

End date: 13/03/01

Key word CAENTI: Governance

Source: Briefing Papers

[37] Project title: Science, Technology and Governance in Europe

Main coordinator: Peter HEALEY

Address: Brunel University, Department of Human Sciences, Kingston Lane, GB UB8 3PH  
UXBRIDGE

Country: England

E-mail: peter.healey@spsg.org

Abstract: Its aim was to develop and refine a heuristic model of science and technology governance in Europe

End date: 15/12/04

[38] Project title: Social Knowledge for e-Governance

Main coordinator: Rosaria CONTE

Address: Istituto di Scienze e Tecnologie della Cognizione - Consiglio Nazionale delle Ricerche, LABSS - Laboratory for Agent Based Social Simulation, ROMA

Country: Italy

E-mail: rosaria.conte@istc.cnr.it

Abstract: The project aims to an interdisciplinary theory of reputation and to modelling the interplay between direct evaluations and meta-evaluations in three types of decisions: epistemic, strategic and memetic

End date: 01/04/09

Key word CAENTI: Governance

Source: Community Research

[39] Project title: Global Governance, Regionalisation and Regulation: The Role of the EU

Main coordinator: Richard HIGGOTT

Address: The University of Warwick, Centre for Study of Globalisation and Regionalisation, COVENTRY

Country: England

E-mail: richard.higgott@warwick.ac.uk

Abstract: The overall aim of this project is to develop a multi-dimensional set of integrated activities that will contribute to the development of a European Research Area for Global Governance, Regionalisation and Regulation via the establishment of a multi-disciplinary, European network of scientific excellence consisting of scholarly researchers, analysts and practitioners with expertise in it

End date: 01/06/10

Key word CAENTI: Governance

Source: Community Research

[40] Project title: Governance for Sustainability

Main coordinator: Richard MARTINSEN

Address: Metropolitan Region of Hannover, Regional and European Affairs, HANNOVER

Country: Germany

E-mail: reinhard.martinsen@hannover-stadt.de

Abstract: It will develop an innovative analytical model for the study of governance for sustainability, focusing on the synergy between new governance modes and different forms of knowledge, taking into account the rapid changes in the knowledge society

End date: 01/02/09

Key words CAENTI: Governance, sustainable development

Source: Community Research

[41] Project title: New Modes of Governance

Main coordinator: Adrienne HERITIER

Address: European University Institute, Robert Schuman Centre for Advanced Studies - RSCAS, SAN DOMENICO DI FIESOLE

Country: Italy

E-mail: adrienne.heritier@iue.it

Abstract: The aim of this integrated Project is to produce a deeper conceptual, empirical and normative understanding of all aspects of governance within and beyond Europe, giving special attention to the emergence, execution, evaluation and evolution of new and innovative modes of governance

End date: 01/09/08

Key word CAENTI: Governance

[45] Project title: Strategies for Regional Sustainable Development: an Integrated Approach Beyond Best Practice (REGIONET)

Main coordinator: ICCR

Address: The Interdisciplinary Centre for Comparative Research in the Social Sciences & The European Association for the Advancement of Social Sciences Schottenfeldgasse 69/1, A-1070 WIEN

Country: Austria

E-mail: [www.iccr-international.org/regionet](http://www.iccr-international.org/regionet)

Abstract: REGIONET organized four major conferences to discuss strategies for regional sustainable development and related issues.

Duration: 2002-2004

Key word CAENTI: Sustainable development

Source: Broadsheet

### ***3. PROSPECTS***

The study of the intersection between the 27 GDs, the European programmes and the management centers started. From now on, it will be completed by a consultation of the general directions, which will be jointly about the information they keep which are relevant and which give complements to the ones that were identified by the WP4I. The consultation

of archives was not necessary until now. From now on, it will have to be combined with a consultation about the information.

The validation of the projects by the members of the coordination group is in progress. Consequently, according to the organisation that was defined during the coordination meeting of LIEGE, the work programme of 2007 will be about:

1. Contacting the projects responsiblees on the base of the linguistic division that was made in LIEGE so as to validate their relevance and to make a first evaluation of these projects. Previously, an evaluation grid should be defined.

2. Selectind ten projects to be evaluated in a more deepened way in the prospect of the seminar, at the time of a coordination meeting.

3. Organizing the seminar during the same meeting.

4. Visiting the invited projects to prepare the seminar.

5. Finalising the seminar programme, which topic could be “the uses of territorial intelligence in Europe”, at the time of the International Conference of Territorial Intelligence of HUELVA, in October 2007.

It seems difficult to organize this seminar by the end of the year 2007 as it was initially planned.

As regards the information the General Directions have and that are relevant in the territorial intelligence field, the survey we made towards the General Directions will be able to be started now, jointly to complement about the projects, on the base of the repertory of territorial information that was established by the WP4I

Then, it will be necessary to determine if it would not be better this prospection is led by the WP4I, as it will complete the research that was started by the group, which is moreover geographically close to the European Commission.

This prospecting will have to be inscribed in the prospect of the execution of a European portal of territorial intelligence information, which is programmed in 2008.

## ***CONCLUSION***

During the first ten months of the CAENTI action, we firstly focused on the projects.

Indeed, we decided to wait for the results of the first research actions of the WP4I group about territorial information and indicators. This group started making a state of the art of the territorial information that are available on Internet, initially on the European web sites that are supplied with the European Commission. Eventually, it could complete its research activity by adding the information of the General Directions to its inventory of territorial intelligence information, in the prospect of the execution of a portal of statistical information that have a socio-economic nature and that are directed towards the territorial intelligence researchers and actors.

Although we made the identification of the relevant research projects with a set of key-words we considered as open, the first identifications of research projects were far too selective. It was linked to the often polysemous nature of these key-words that were usually used in the projects presentations but with very varied meanings. Each key-word led to select a wide group of projects, but their intersection was too selective. By widening the key-words range, by combining the research from repertories and European data bases, by direct requests on Internet, but also by involving the members of the coordination group in the analysis of the research results, we eventually made a pre-selection of 45 projects.

From now on, we should:

- completing this pre-selection by complements of local research actions;
- Analysing the projects that go our attention to confirm their relevance with territorial intelligence;
- Starting their evaluation with particular interviewss, a global confrontation at the level coordination group widened to actors, some visits of projects and the

organization of a seminar during which there will be a debate between the projects we will consider as relevant and the CAENTI researchers and actors.
